Abstract

15

There is provided a process for producing a modified polyolefin resin, which comprises the steps of:

- (1) blending at least the following components (A) to (D) to produce a blend:
 - (A) 100 parts by weight of a polyolefin resin,
 - (B) from 0.1 to 20 parts by weight of a compound having an epoxy group and an unsaturated bond,
- (C) from 0.01 to 20 parts by weight of an organic peroxide having a decomposition temperature of from 50 to 115 $^{\circ}$ C, at which temperature a half-life thereof is 1 minute, and
 - (D) from 0 to 20 parts by weight of an organic peroxide having a decomposition temperature of from 150 to 200 $^{\circ}$ C, at which temperature a half-life thereof is 1 minute, and
 - (2) melt-kneading said blend to produce a modified polyolefin resin.
